

Department of Electrical and Information Engineering
EE7802/EC7802 Undergraduate Project
Academic year 2026
End Semester Evaluation- Guidelines

Report

- Ensure that all required content is included in the report.
- The cover page **must be signed by the supervisor**. Reports without the supervisor's signature will not be accepted.
- Include clear, high-quality images in the report. All text within images must be readable. Data presented in graphs should be clearly visible and easy to interpret.
- Any images taken from other sources must be properly cited following the required citation format.
- Each figure must have a specific caption that provides a clear overview of the content depicted.
- Submit the report using the **Google Form** provided on the **LMS**.
- The **same version** of the report must also be submitted to **Turnitin** for **plagiarism and AI content detection**. The course information in Turnitin is as follows:

Class name: EE7802/EC7802 UGP Final Report Submission 2026

Class ID: 53831688

Class Enrolment Key: 7802_end23

- The report will be checked for plagiarism and AI-generated content. To meet submission requirements, **plagiarism and AI-generated content must be below 25%**. Reports exceeding this limit will need to be revised and resubmitted.
- Name your report using the following format:
Project ID_Project title
Example: 1_Enhancing the Security of xApps in O-RAN Using Code Integrity Mechanisms and Remote Attestation

Presentation and VIVA

- 15 minutes is allocated for the presentation, during which all group members are expected to present. It's essential that students manage their time effectively to ensure the presentation **concludes within this 15-minute timeframe**.
- Following the presentation, there will be a VIVA session. Each student has been assigned a **7-minute** slot for their **individual VIVA**.
- Students are required to bring a flash drive or laptop containing PowerPoint slides for the presentation.
- Students should ensure their PowerPoint slides are displayed correctly on the designated computer at the presentation venue. If using a different device, verify compatibility in advance and test the connection to the projector to avoid technical issues.

Demonstration

- Time allocated for the demonstration is 20 minutes. **One of the group members** should briefly present the essence of your project and outline the proposed solution within the **first 5 minutes**.
- Following this, the group should proceed to showcase the project through a practical demonstration. To enhance the clarity of your presentation, feel free to incorporate videos, images, and/or posters.
- Students should anticipate questions from the evaluation panel and be ready to address them effectively. Supporting materials such as simulation models, slides, codes, and other relevant required information should be on hand to provide comprehensive responses.
